

CAPABILITY STATEMENT

SEPARATOR TECHNOLOGY SOLUTIONS US INC.

COMPANY SUMMARY

Separator Technology Solutions (STS) designs, manufactures, and services high-speed disk centrifuges for various industries worldwide. Known for performance, reliability, and cost-effectiveness, we also provide parts and services for GEA Westfalia separators, with a large US inventory for quick shipment. As a small, agile company, we deliver custom solutions quickly and respond to customer needs without delay. We back our products with a written performance guarantee and have the global reach to ensure projects are completed on time and within budget. Our offerings include high-speed centrifugal clarifiers, separators, and comprehensive industrial repair services.

MISSION STATEMENT

To provide state-of-the-art separation technology solutions for all industries.

OUR VISION

To be recognized as leaders in separation technology, surpassing customer expectations and serving as a reliable and efficient partner.

DIFFERENTIATORS

- **Agility:** Our small size enables us to respond rapidly to customer requests, often providing quotes within 24 hours.
- **US Inventory:** With a large inventory of parts in the US, we minimize reliance on European supply chains, ensuring quick delivery and reduced downtime for our customers.
- **Cost-Effective Solutions:** We produce OEM-compatible versions of high-turnover, high-cost parts, allowing our customers to reduce operational expenses by 30–40%.
- **Customer Partnership:** We position ourselves as a partner and advisor, dedicated to helping our customers achieve their goals rather than just supplying products.

CORE COMPETENCIES

DISC CENTRIFUGE DESIGN AND MANUFACTURE:

- Expertly engineered high-speed disk centrifuges for a wide range of applications.
- Custom solutions tailored to meet specific industry needs.
- Advanced designs that ensure superior performance and reliability.

SERVICE AND SPARE PARTS FOR GEA WESTFALIA DISC SEPARATORS:

- Extensive inventory of spare parts available in the US for rapid delivery.
- Experienced technicians providing maintenance, repair, and support services.
- OEM-compatible parts offering cost-effective alternatives with the same reliability.
